

Sizing chart for 16:9 video

Width (in pixels)	Height (in pixels)	Good for:
1920	1080	Public presentations on HDTVs
1280	720	YouTube, public presentations
854	480	Blogs, online courses
720	405	Blogs, online courses
640	360	Blogs, online courses
560	315	Blogs, online courses
480	270	Blogs with small columns
400	225	Blogs with small columns
320	180	Sidebar column on blogs

You can also create your video in a *larger size*, e.g. 1280 x 720, and then export it for various uses like presentations, online courses, and blog posts (based on the column widths on your website).

Smaller videos play faster, so if you only need it for web delivery, don't go too big.
